# CCHIT-Certified Electronic Health Record

AssistMed's CCHIT-Certified Electronic Health Record (EHR) provides physicians the flexibility of multiple options for clinical documentation capture – options that do not require a change in workflow – so clinicians can focus on patient care.

## Dictation

- One-click dictation with front- or back-end speech recognition and low-cost editing

## Form-Based Entry

- Fill-in forms by using paper and digital pen
- Fill-in forms on the computer
- Forms are optimized for E&M coding and Medical Decision Making criteria

## Custom Templates

- Designed to the unique needs of different users and specialties during implementation
- Ad-hoc template creation enables users to easily create, edit, and manage templates
- Templates are optimized for E&M coding and Medical Decision Making criteria

## Pull-Through and Quick Click Technology

- Pull-through Technology automatically imports notes from other clinicians and previous visits in the Note window
- Quick Click Entry offers checkbox functionality to quickly complete Notes by just checking Normals and findings

## ePrescribing & Electronic Order Management

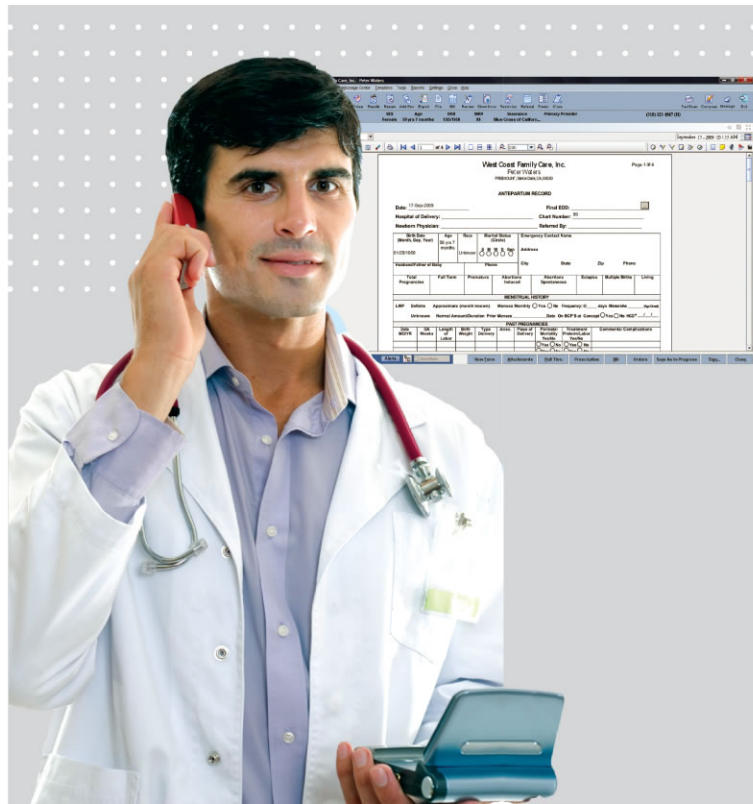

- Connect to: Labs, Pharmacies, Devices, Insurance
- Create custom order sets and templates

## User-Defined Screens, Fields, and Alerts

- User-defined settings: homepage, patient summary, patient history and customized sign-off options
- Fields populated with practice-specific data
- Customized alert settings, including prescription and disease-management alerts

## Integrated, Secure Messaging and Document Imaging

- Sophisticated messaging system permits easy assignment and management of tasks to staff
- Files incoming faxed and scanned documents into patient records with ease

HEALTHCARE IN HARMONY™

## Practice Management System

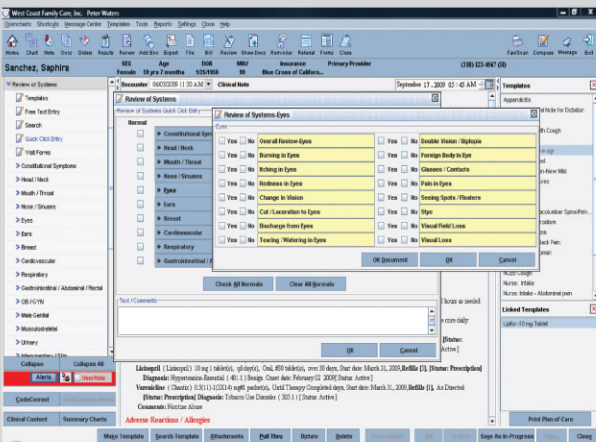

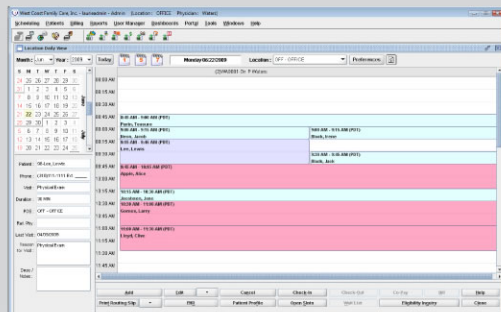

AssistMed's Practice Management (PM) system is integrated with its EHR – information is shared seamlessly between the two applications.

This robust PM system was designed to improve practice administration and office workflow by managing: patient information, appointments, insurance coverage and eligibility, billing, insurance claims, Electronic Remittance Advice (ERA/835), reconciliation, collections, reporting, and analysis. The PM can also be used as a standalone application.

## Patient Portal with Credit Card Processing

Enhance patient communications with the secure Patient Portal, which is integrated with the EHR and PM systems.

The Portal enables patients to: update demographic and contact information, view medical summary, request/reschedule/cancel appointments, view billing statements and current balance, process payments, view medications, request prescription renewals, view results, and send/receive messages.
